Part I: Background

1. Project Overview

Wave 2 of the Community Capacity Survey (CCS) is supported by an Australian Research Council (ARC) discovery grant (DP0771785). It is a continuation of a CCS conducted in 2005 (funded by an ARC Linkage Grant LP0453762) which examined the relationship between collective efficacy and crime rates across 82 Statistical Local Areas (SLAs) in Brisbane. The overarching goal of Wave 1 of the CCS was to analyse the spatial distribution of the social processes important for the prevention of crime across Brisbane neighbourhoods. Wave 2 of the CCS focuses on the changes in these social processes over time and examines whether such changes influence crime and victimisation. Specifically, this project aims to build a longitudinal understanding of the dynamic role of collective efficacy (CE) in explaining spatial and temporal variations in crime in urban communities in Australia.

2. Literature Review – Collective Efficacy and Crime

Ecological (or place-based) theories of crime have a long history beginning with analyses of crime rates in French provinces in the 19th century (Guerrey 1833; Quetelet 1842). In the United States, "ecological theories" emerged with the Chicago School analyses of delinquent behaviour by Park, Burgess and McKenzie (1925) and Shaw and McKay (1942). This research investigated social structural influences on adolescents' behaviour in high-crime areas, identifying several ecological variables (such as high infant mortality rates, low median rental costs, low percent of owner-occupied dwellings, close proximity to industrial sites, and high rates of signs of decay) that explained delinquent behaviour (see Bursik 1988; Kornhauser 1978; Thomas & Znaniecki 1920).

The pioneering works of the Chicago School sociologists spawned research throughout the world on crime and place. Bursik (1986, 1988) and Schuerman and Kobrin (1986) examined stability and change over time in the crime rates of communities; Taylor (1988) coined the term territorial functioning to describe variations in crime across small places; Chavis and his colleagues (McMillan & Chavis 1986; Chavis, Speer, Resnick & Zippay 1993) have studied community capacity; Greenberg and Rohe (1986) as well as Sampson (1986) have examined the role of informal social control in explaining crime variations across communities; Putnam (1993, 2000) and Coleman (1990) have studied the spatial distribution of "social capital" or what is referred to as the social "good" embodied in the relations among persons and positions (Coleman 1990: 304). Most ecological studies use the community or neighbourhood as the unit of analysis and draw on census data, survey data and economic indicators to examine aggregate-level causes of crime (Cohen, Kluegel & Land 1981; Hough 1987; Sampson 1985; Smith 1986).

Australians, too, have shown a history of interest in the spatial distribution of crime. For example, Vinson and Homel (1975) studied the coincidence of medical and social problems (including crime) in Newcastle communities; Braithwaite (1979) examined social status and crime across Australian communities. Weatherburn and Lind (2001) analysed Sydney-area neighbourhoods and proposed an epidemic model of growth in the offender population derived from measures of economic and/or social stress, especially in the absence of social supports (2001: 124). Others, such as Matka (1997) and Murray and his colleagues in Brisbane (1998) have contributed to our understanding of spatial crime patterns in Australia.

In the early 1990s the John D. and Catherine T. MacArthur Foundation in partnership with the National Institutes of Justice and Mental Health, Harvard School of Public Health, the Administration on Children, Youth and Families of the U.S. Department of Health and Human Services, and U.S. Department of Education dedicated millions of dollars to fund the longitudinal Project on Human Development in Chicago Neighborhoods (PHDCN) study. The PHDCN gathers data and examines the social, criminological, economic, organisational, political and cultural structures of Chicago's neighbourhoods. Data continue to be collected from almost 9,000 residents of the 343 Chicago neighbourhoods, from more than 2,800 community leaders and from a sample of more than 6,000 children and adolescents. PI Sampson is the scientific director for community design on the PHDCN and an author of many leading articles from the PHDCN.

One of the key criminological findings from the PHDCN is that traditional ecological constructs such as social disorganisation, social structure and even social capital (see Coleman 1988, 1990; Putnam 2000) fail to explain contemporary spatial variations in crime across the Chicago landscape. Alternatively Sampson and his colleagues identified a new construct that they term "Collective Efficacy" (CE) as better fitting the data on the spatial patterns of crime. CE assumes that the degree of and mechanisms for informal control are not the same in all neighbourhoods. Sampson and Raudenbush (2001: 2) say that:

where there is cohesion and mutual trust among neighbors, the likelihood is greater that they will share a willingness to intervene for the common good. This link of cohesion and trust with shared expectations for intervening in support of neighborhood social control has been termed "Collective Efficacy," a key social process proposed...as an inhibitor of both crime and disorder.

Thus, CE is a 'mechanism that facilitates social control without requiring strong ties or associations' (Sampson et al. 1997, 1999). As distinct from other ecological constructs such as informal social control, community capacity and social capital, CE is a task-specific construct that exists relative to particular, perhaps episodic, neighbourhood problems. It highlights shared expectations and mutual engagement by residents in their

efforts to impose local social control for specific crime or social problems (Morenoff, Sampson & Raudenbush 2001; Sampson et al. 1999). Research exploring the spatial distribution of CE using the PHDCN data has found that CE is the most ‘...proximate social mechanism for understanding between-neighbourhood variation in crime rates’ (Morenoff et al. 2001: 521).

Research in Chicago (Sampson Raudenbush & Earls 1997), Stockholm (Wikstrom & Sampson 2002) and several smaller U.S. cities (see Gibson, Zhao, Lovrich & Gaffney 2002) indicates that CE helps to explain the relationship between neighbourhood social composition and crime levels. CE represents a process for mobilising social capital to tackle specific neighbourhood problems. Compared to related concepts such as social disorganisation, community renewal, community capacity building, community empowerment and community engagement, CE is a task-specific construct that describes community-based mechanisms that facilitate social control without necessarily requiring strong ties or associations amongst community members. By investigating how communities might more effectively protect themselves against crime, this project seeks to provide policy makers with evidence to inform community-based approaches to crime prevention and subsequently reduce crime in Australia.

3. Previous Waves

The initial wave of the Community Capacity Study (CCS) built upon a pilot study of CE in Brisbane (funded by Griffith University in 2001) implemented in May 2002 in partnership with PI Sampson and the Office for Economic and Statistical Research (OESR). The pilot study surveyed a small sample of residents asking questions that replicated the relevant CE items from the PHDCN community survey. Wave 1 of the CCS also built upon the GIS-based analysis of crime in Brisbane in the mid 1990s conducted as part of an ARC Collaborative Project #C49301132 led by CI Stimson. Wave 1 of the CCS examined the applicability of CE in explaining the spatial variation in crime and victimisation across 82 statistical local areas (SLAs) in the Brisbane Statistical division. Results from this study indicated that CE significantly varied across the 82 areas. Further this study showed that residents living in collectively efficacious communities were significantly less like to report being victimised even after controlling for the level of socio-economic disadvantage in the area, prior crime rates and the density of community programs aimed at enhancing social cohesion (see Mazerolle, Wickes and McBroom, 2010).

4. Research Aims

The second wave of the CCS aims to enhance the theoretical and empirical understanding of the dynamic role of collective processes, social relationships and social structures in explaining spatial and temporal variations in crime across Australian communities. This project seeks to examine within and between community variations in crime over time. In so doing it explores the changing patterns of socio-demographic characteristics and their impact on the social relationships and collective processes that influence crime trends within and between places. Two broad research questions guide the 2nd wave of the CCS: (1) Does CE vary across Brisbane neighbourhoods across time? (2) If so, is this variation attributable to changes in crime or social-structural factors such as socio-economic status, race, poverty and concentrated immigration? This program of research is the first empirical test of the spatial and temporal dynamics of CE and crime in Australia. The project will build upon wave one of the Community Capacity Study (2005) and existing knowledge about collective efficacy, communities and crime.

Part II Survey Design

1. Overview

This section of the technical report first describes the study design. It then goes on to discuss sample size requirements and power in multilevel designs. This is followed by an outline of the approach used to select Brisbane communities for the study. As this is a longitudinal study, this report first outlines the approach used to select communities for Wave 1 and then outlines changes made in the Wave 2 study design.

2. Study Design

The examination of the CE-crime relationship in different communities, by necessity, involves a hierarchically nested study design, known as a multilevel design. A multilevel model concerns the analysis of data that are measured at multiple levels of a hierarchy. For instance, a researcher may be interested in individuals (the micro-level) as well as the neighbourhoods in which individuals reside (the macro-level). For further discussion of the rationale behind the employment of a multi-level, nested design, please see the Wave 1 Technical Report (Mazerolle, et. al, 2007).

3. Neighbourhood-Level Reliability of Collective Efficacy

According to Raudenbush and his colleagues (1991), internal reliability of a neighbourhood-level measure depends upon four quantities: the number of items in the scale; the amount of inter-correlation among items at the neighbourhood level; the level of inter-rater agreement among individuals within a given neighbourhood; and the number of individuals sampled within the neighbourhood. In Wave 1, it was found that 14 percent of the variability in CE was attributable to the SLA and that it was a highly reliable construct at the level of the individual and the SLA.

4. Study Area

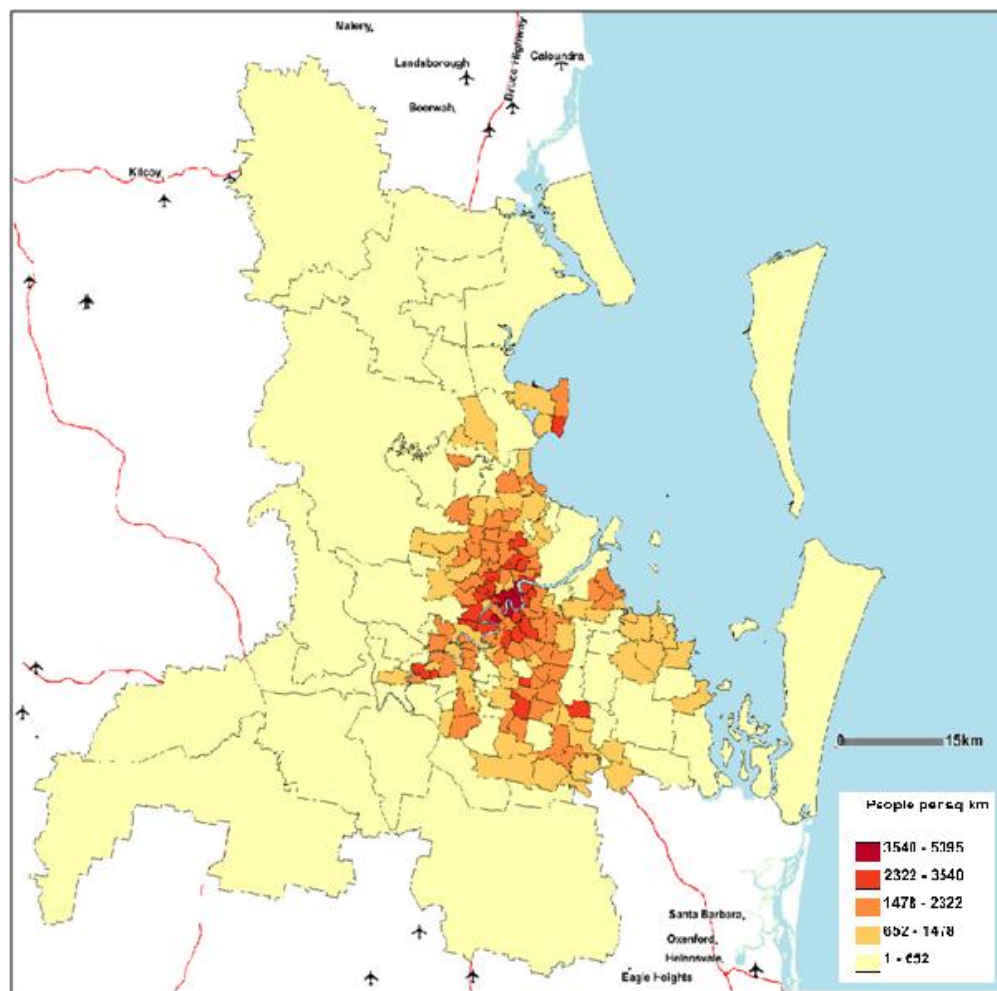

The study area for the CE project is the Brisbane Statistical Division (SD) (see figure 1 for a map of the BSD). The Brisbane SD consists of 224 Statistical Local Areas (SLAs) and 2913 Collection Districts (CDs).

Sampling Methods

The initial sample in Wave 1 was selected to investigate both within and between SLA effects, including the effects of SLAs on their neighbours (see Appendix 1 for included SLAs). To select SLAs, the entire Brisbane Statistical Division (N=224) was included as the sampling frame. Any large areas of industrial and commercial land use were excluded leaving N=201 eligible SLAs in the sampling pool¹.

¹ The procedure used to exclude industrial/commercial SLAs was as follows: data were obtained on land use from the Department of Local Government. The land use data was divided into residential (including rural

Figure 1: Brisbane Statistical Division - *Population density (people per sq km)**

* source Australian Bureau of Statistics

Eighteen core SLAs were randomly selected from the remaining eligible SLAs. In addition, all SLAs which adjoined the core sample (N=64) were included in the selected sample. The final sample was N=82 SLAs.

In Wave 1 of the CCS individuals were sampled within selected SLAs. To do so a quota scheme was employed to determine the number of required respondents per SLA. The quota scheme operated as follows: each SLA was assigned a quintile score by population size (score of 1-5 from low population size to large population size); each SLA was then assigned a quartile score by coefficient of variation² (score of 1-4 for the added

residential and urban residential), commercial, industrial (including industrial light/medium + industrial heavy/other), special purposes (CBD land use), and other (including special facilities, conservation, rural, sport and recreation, open space). We did not want to include SLAs with high industrial and commercial land use due to the small numbers of residents living in these areas. We excluded all SLAs that (a) had less than 50 percent residential/other land parcels or (b) greater than 40 percent industrial land parcels. This criteria excluded N = 23 SLAs.

² The Coefficient of Variation (CV) was used as a measure of between-SLA similarity regarding socio-demographic variables. We used means and standard deviations of those CDs within each SLA for calculating

coefficient of variation from low variation to high variation); the scores were added together to give a distribution of scores from 2 to 9. For SLAs with a score of 2 or 3 (ie low population and low CV), the survey quota was 20 respondents. For SLAs with a score of 4, 5 or 6, the survey quota was 35 respondents. For SLAs with a score of 7, 8 or 9 the survey quota was 45 respondents.

In Wave 2 of the CCS individuals were sampled within selected *suburbs* as research suggests that in Australia people tend to associate their local community with the suburb in which they reside (see Mazerolle et al, 2007). Moreover, SLA boundaries often change and therefore the suburb is a more reliable unit of analysis. Administrative data was not available at the state suburb level at Wave 1 which is why this unit of analysis was not employed at that time.

As this program of research involved a longitudinal component the original sample of SLAs was retained and the Wave 2 sample included all suburbs fully or partially encapsulated in these 82 SLAs. This allows for a comparison at the SLA level at Wave 1 and Wave 2 and for all further waves of data collection. After omitting suburbs for which census data was unavailable, 148 suburbs remained in the sample, with populations ranging from 240 to 20,000, out of the total 429 suburbs in the Brisbane Statistical Division. As in Wave 1, a quota scheme was used to determine the number of required respondents per suburb. The quota scheme operated as follows: each suburb was assigned a quintile score by population size (score of 1-5 from low population size to large population size); each suburb was then assigned a quartile score by a “coefficient of variation” (as with the Wave 1 CV this measured suburb variation in social structure). A score from 1-4 for the added coefficient of variation represented low to high variation respectively. The scores were added to give a distribution of scores from 2 to 9. Score of 2 or 3 (i.e. low population and low cv), the survey quota was 20 respondents. Score of 4, 5 or 6, the survey quota was 35 respondents. For a score of 7, 8 or 9 the survey quota was 45 respondents.

the CV. The initial idea was to sample those SLAs with low variation in terms of population and socio-economic variables. The coefficient of variation is calculated as $CV = \text{standard deviation} / \text{mean}$. The means and standard deviations were calculated for the population and socio-economic variables including population size, SEIFA indexes, ethnicity (such as born overseas), population density (population/hectares), mobility (such as different address 5 years ago), fully owned and rented dwellings. See the Technical Report for Wave 1 of the CCS for more information.

Part III: The Community Capacity Survey (CCS) Variables

The CCS is based on a comprehensive literature review, an examination of relevant national and international surveys and input from researchers in the field of crime prevention, crime control, incivilities, collective efficacy and social capital. For the Wave 2 survey many of the items used in the Wave 1 CCS survey were retained. These included past victimisation information, perceptions of disorder, violence, fear and demographic information. Items from the Wave 1 survey were drawn mainly from the Chicago PHDCN survey, the Australian Bureau of Statistics (ABS) report *Measuring Social Capital: An Australian Framework and Indicators* (2004), the Social and Economic Research Centre (SERC) recommendations on social capital measures, the General Social Survey (GSS) and a number of journal articles exploring disorder and neighbourhood problems (Piquero 1999; Spelman 2004; Taylor 1996). For a full discussion on item selection for the Wave 1 survey see the Wave 1 Technical Report (Mazerolle et al 2007).

Several changes to the Wave 2 instrument were made. These changes were in line with the research questions driving Wave 2 of the CCS. A discussion of these changes follows. The complete survey instrument for Wave 2 appears in Appendix 2. An overview of all items that have not changed from Wave 1 can be found in the Wave 1 Technical Report.

Collective Efficacy

The collective efficacy scale in its original form assesses the capacity of communities to address a variety of problems, all of which are then combined to form one scale. In order to determine the differential capacity of neighbourhoods to deal with particular problems, Wave 2 included several scales that examine the efficacy of communities to target/address specific community issues including, child centred control; violence; disorder; and civic matters. To this end, several new items were constructed and pilot tested as detailed below. Univariate statistics are noted in Appendix 3 along with scale reliabilities. Note that as the pilot survey was conducted on university students, there was insufficient demographic variation to assess reliabilities across groups (eg sex, age, education, suburb of residence).

Collective Efficacy for Violence

- If there was a fight in front of your house and someone was being beaten or threatened, how likely is it that people in your community would break it up?
- If a violent argument broke out between a woman and a man in their private residence, how likely is it that people in your community would do something about it?
- If somebody was getting mugged, how likely is it that people in your community would help that person?

Collective Efficacy for Child Centred Control

- If a group of community children were skipping school and hanging around on a street corner, how likely is it that people in your community would do something about it?
- If some children were spray painting graffiti on a local building, how likely is it that people in your community would do something about it?
- If young people were swearing in public space, how likely is it that people in your community would do something about it?
- If a child was showing disrespect to an adult, how likely is it that people in your community would scold that child?

Collective Efficacy for Disorder

- If someone was publicly dealing drugs in your community, how likely is it that people in your community would do something about it?
- If someone was drunk in public in your community, how likely is it that people in your community would do something about it?
- If people were speeding in cars along the streets in your community, how likely is it that people in your community would do something about it?

Collective Efficacy for Civic Matters

- Suppose that because of budget cuts the fire station closest to your home was going to be closed down. How likely is it that people in your community would do something to keep the fire station open?
- If someone in your community was cutting down trees without council approval, how likely is it that people in your community would do something about it?
- If a new legal brothel was being planned for your community, how likely is it that people in your community would work together to stop it?
- If there were run down and abandoned buildings in your community, how likely is it that people in your community would lobby council to address this problem?

Neighbouring Behaviour

For Wave 2 the neighbouring questions were extended to include items measuring instrumental and affective neighbouring practices, each measured by 3 items. These items were derived from the reciprocated exchange scale in the PHDCN survey as follows (univariate details are located in Appendix 3):

Instrumental Neighbouring

- How often do you and your neighbours do small favours for each other? (By favours, we mean watching each other's children, helping with shopping, lending garden tools or other small acts of kindness).
- When a neighbour is not at home, how often do you and other neighbours watch over their property?
- How often do you and other neighbours in your community ask each other advice about personal things such as child rearing or job openings?

Affective Neighbouring

- How often do you and other neighbours in your community have parties or other get-togethers?
- How often do you and other neighbours in your community visit in each other's homes or on the street?
- How often do you and other neighbours in your community spend leisure time together going out for dinner, to the movies, to a sporting event etc?

Two additional neighbouring items are also included as follows:

- How many of your neighbours would you know by name?
- How many times have you had contact with a neighbour in the previous week?

Ecometric Place Attachment

Two 'ecometric' focused place attachment items were included in the Wave 1 instrument. With only two items, this scale was not reliable at the level of the SLA. This scale was therefore extended to encompass 5 items and was pilot tested (see Appendix 3 for univariate statistics). The items that comprise this scale include:

- People in my community feel like they belong.
- People in my community are proud to live here.
- People in my community feel a responsibility to make a contribution to the area.
- Most people in my community would like to continue living in this area.
- People in this community live here because they want to.

Responsibility for Community Problems

Based on interviews with community residents in Pullenvale and Griffin Mango Hill, it was clear that many of the respondents did not take personal ownership of community based problems. To further explore the allocation of responsibility for community problems, the following question was asked in the pilot study:

- Who do you think should be primarily responsible for handling the following problems in your community?

Participants were given a range of response options including Police, Council, Local Service Providers, Community Groups and Community Residents. The problems included in the pilot study were:

- Vandalism and/or graffiti in public space
- Paint sniffing, chroming in public space
- Drug use in public space
- Drug dealing in public space
- Drinking in public space
- Young people loitering in groups in public space
- Fights in public space
- Traffic problems like speeding or hooning
- Disputes with neighbours.

Response frequencies for each item are located in Appendix 4. In the interest of space in Wave 2, the following items were retained for the final Wave 2 instrument:

- Vandalism and/or graffiti in public space
- Drug use in public space
- Drinking in public space
- Young people loitering in groups in public space
- Fights in public space
- Traffic problems like speeding or hooning
- Disputes with neighbours.

Items from Wave 1 omitted from Wave 2

Several items from Wave 1 were omitted due to the lack of variation in the items or the lack of relevance to Wave 2. These are follows:

Collective Efficacy

In the first survey, participants were asked:

- If public officials asked everyone to conserve water or electricity because of some emergency such as severe drought, how likely is it that people in your community would participate.

As this item did not add substantially to the CE scale this item was removed.

Particularised Trust Scale

In Wave 1 this scale performed very badly across all 82 SLAs. As a measure of community trust is included in the collective efficacy scale, this scale was removed.

Generalised Trust Item

Although this item (most people can be trusted) was an important individual indicator of perceived violence and disorder, it is not substantially different from the community trust question (people in this community can be trusted). As the unit of analysis is the community, this item was removed from Wave 2.

Community Division Items

In the first survey participants were asked if, in their community, there were notable differences in a) religious beliefs and b) ethnic backgrounds. These items, combined and used as a scale, showed almost no variation between SLAs and therefore did not (or could not) discriminate between place. These items were removed from Wave 2.

Tolerance of Diversity

Likewise the two items measuring tolerance of diversity (multiculturalism makes life in my community better and I enjoy living amongst people with different lifestyles) did not vary much across the SLAs. These items were removed from Wave 2.

Self Efficacy Question

In the first survey respondents were asked how much influence they felt they had over things that were happening in their local community. As the focus of our research centres on community processes, this item was omitted.

Quality of Life Question

In this first survey, respondents were asked to rate their quality of life (QOL) on a 5 point likert scale. This was the only QOL question included in the survey. As it is a very imprecise item and as the focus of the research does not centre on QOL per se, this item was removed.

Ecometic Civic Engagement

The new collective efficacy scale measuring the willingness of fellow residents to deal with specific civic matters supersedes this scale. Thus these items were removed.

Items/Scales retained for Wave 2

- Demographic Items (All demographic items were repeated, including mobility, length of residence and address)
- Original Collective Efficacy Scale (All items from the informal social control and social cohesion and trust scales)
- Psychometric Place Attachment
- Psychometric Civic Engagement Scale
- Number of Kith/Kinship Ties
- Feeling Safe at Night
- Community Problems
- Victimization Scale
- Victimization Items
- Future participation question

Part IV: The Main Study, Wave 2 – Data Collection

1. Administration of the Community Capacity Study Wave 2

The CCS Wave 2 was conducted by the University of Queensland Social Research Centre (UQSRC) from 20th September 2007 to the 21st of May 2008³. The survey administration was performed using Computer Assisted Telephone Interviewing (CATI). The in-scope survey population was comprised of all people aged 18 years or over who were usually resident in private dwellings with telephones in selected suburbs in the Brisbane Statistical Division.

Sample Design and Selection

In the CCS survey Wave 1, residents were asked if they would be willing to participate in a future research. A total of 65% of respondents (n = 1,858) agreed to do so, and provided their names, addresses and contact details. The first stage of the sampling process was to contact these participants and ask them to participate in the Wave 2 survey. Of the 1,858 respondents who agreed to participate in future research in Wave 1, 1,077 participated in the Wave 2 survey. Following the collection of this longitudinal sample, a top-up sample was generated to make up the quota for each suburb.

The top-up sample was generated using Random Digit Dialling (RDD) in combination with the Electronic White Pages (EWP). RDD was used in order to attempt to include as many unlisted or ‘silent’ numbers as possible as well as to ensure random selection. RDD works by selecting telephone numbers from ranges of possible telephone numbers created by finding the maximum and minimum listed telephone numbers in each four-digit prefix combination in the Electronic White Pages. The RDD frame does not have reliable information on the location of each telephone number so the numbers were compared with EWP records in order to check the location of telephone numbers and to exclude those numbers that were out of the sampling frame. Numbers were also compared with records of Wave 1 participants to avoid overlap.

For each interview, interviewers determined if the suburb was in-scope. One usual resident aged 18 years or older was then selected randomly from each in-scope household and, if they consented and could be contacted during the interviewing period, was interviewed.

When the data collection phase of the survey was complete, the respondents’ addresses were geocoded based on the address information given in the interview. As a result, some respondents were geocoded in suburbs other than those reported at the start of the interview. This resulted in some respondents being moved to other in-scope suburbs, and some respondents becoming out of scope.

³ The longitudinal sample was collected between 20th September 2007 and 12th December 2007, the top-up sample was collected between the 12th of February 2008 and the 21st of May 2008.

2. Status of sample units at completion of survey – Longitudinal Sample

For the longitudinal sample, all participants from Wave 1 who had indicated a willingness to participate in future research and had provided contact details were called. This included 1,844 telephone numbers. The status of all sampling units collected in the longitudinal period is reported in Table 4.1.

Table 4.1 Status of Sampling Units – Longitudinal Sample

Phone Number Status	Number	Percentage
Total number of interviews	1077	58.41%
Refusal	93	5.04%
Failed intro screener	16	0.87%
Respondent permanently relocated	85	4.61%
Respondent dead	6	0.33%
Invalid number	59	3.20%
Wrong number	91	4.93%
Disconnected	248	13.45%
Not contactable (engaged, fax, answering machine, not answered)	123	6.67%
Out of scope suburb/Doesn't know suburb name	16	0.87%
Business	6	0.33%
Disability/illness	23	1.25%
Language barrier	1	0.05%
TOTAL NUMBER USED	1844	100.0%

3. Status of sample units at completion of survey – Top-Up Sample

In the top-up sample, 17,881 sampling units (telephone numbers) were drawn however only 17,362 were attempted in order to achieve the sample quotas. Of these, 3,247 interviews were conducted. The average length of the interviews was 20 minutes. The status of all sampling units collected in the top-up period is reported in Table 4.2.

Table 4.2 Status of Sampling Units – Top Up

Phone Number Status	Number	Percentage
Total number of interviews	3247	18.7%
Refusal	3724	21.4%
Not contactable (engaged, fax, answering machine, not answered)	1440	8.3%
Out of scope suburb/Doesn't know suburb name	16	0.1%
Quota full	4687	27.0%
Invalid/disconnected	3532	20.3%
Business	286	1.6%

Disability/illness	70	0.4%
Language barrier	164	0.9%
Not available during survey period	196	1.1%
TOTAL NUMBER USED	17362	100.0%

4. Response Rate and Cooperation Rate

Calculation of the response and cooperation rates is guided by the *Standard Definitions:*

Final Dispositions of Case Codes and Outcome Rates for Surveys (American Association of Public Opinion Research [AAPOR], 2011). The response rate is calculated as:

$$(complete)/(complete + partial\ complete + unknown\ eligibility + eligible\ non-interview)$$

The cooperation rate is calculated as:

$$(complete)/(complete + partial\ complete + eligible\ non-interview)$$

Response rates and cooperation rates were calculated for each of the following sample groups: the longitudinal sample (i.e. those who had participated in Wave 1), the top-up sample (i.e. those who were contacted via RDD and the SamplePages), and the total sample. The longitudinal sample had a response rate of 81.8% and a cooperation rate of 90.28%. For the top-up sample the response rate was 38.28% and the cooperation rate was 44.8%. Response and cooperation rates for the total sample were 43.27% and 52.5% respectively. The higher response rate for the longitudinal sample is not surprising as those who participated in the longitudinal sample had previously indicated that they were willing to participate in future research.

5. Interview audits

Interviews were audited to ensure that the interviews were conducted in a reliable and professional manner. Five percent of the 3247 interviews were selected at random and audited through OzQuest (the CATI program) in addition to being monitored by shift supervisors. Questions that were audited included age, gender, country of birth, number of dependent children, highest education, employment status, religion, names and phone number. Overall 2434 questions were verified and 32 errors were recorded. This resulted in a data entry error rate of 1.3%.

6. Data cleaning

CCS Data

The survey data (n = 4244, N=148 suburbs) was received from the Institute of Social Science Research, University of Queensland, CATI lab in an excel file and was transferred to SPSS for the purposes of data cleaning and analysis. Descriptive statistics indicated that the level of missing data was above the acceptable limit (5%) for some items (refer table 4.3). For all variables numeric values 1-4 were replaced with -2 – 2 to enable the inclusion of 0, as indicative of missing or “I don’t know” responses.

Table 4.3 Items missing data > 5%

Item	Question wording	% missing (don’t know or refused)
V3R12	If a new legal brothel was being planned for your community how likely is it that people in your community would work together to stop it?	5.2
V4R05	People in this community do not share the same values.	5.3
V4R12	There are adults in this community that children can look up to.	6.7
V4R13	Parents in this community generally know each other.	5.5
RCV5R04	People in my community feel a responsibility to make a contribution to the area.	5.7

Low income

Cases were considered to be “low income” if the household weekly income was less than \$500. The Australian Bureau of Statistics defines low income as falling in the lowest thirtieth percentile of the population. Median household income in Queensland is \$1033, the thirtieth percentile was \$499, this figure was rounded to \$500.

Address information

Street addresses were checked to ensure that they were entered correctly. This involved correcting spelling errors in street and suburb names, by referring to ABS information, and amending incorrect street extension information. In cases where address was unknown participants were re-contacted to attain correct address information.

Demographic Information

Country of birth information was re-categorised to incorporate “other... specify” entries. New country categories were created if there were multiple (above 10) entries for the same country. Categories were also created for particular regions based on the ABS 1269.0 – Standard Australian Classification of Countries (SACC), 1998. Region categories were

created in cases where it was not feasible to create a category for each of those countries. For a full list of countries entered into regional categories see Appendix 5.

The “highest educational attainment” variable was cleaned and ‘other’ responses were re-coded into categories (see appendix 5). Similarly, the “employment” and “religion” variables were condensed into applicable categories (see Appendix 5). The “home ownership” variable was cleaned and all entries in the other category were allocated to a new or existing category (for full list of amendments see Appendix 5).

The age variable was cleaned by removing all extraneous characters. In cases where an age range was provided, the response was re-coded as the mid-point. Where an age was recorded as being in the XX’s, (e.g. in the 50’s) the response was re-coded as the mid-point of the specified decade, (e.g.55). Cases for which the phrase “elderly” was recorded were re-coded as “refused”.

All respondents were assigned a unique identifier to enable longitudinal follow-up.

Reverse Coded Items

Variables V4R04 (“People in this community generally don’t get along with each other”) and V4R05 (People in this community do not share the same values) were negatively worded items and were subsequently reversed prior to coding.

Quality Control Check – Instructions

A quality control check was carried out on a random sample comprising ten percent of responses. Cases were cross-checked with original data to ensure data integrity was retained throughout the data cleaning process. The cross-check revealed two discrepancies in the dataset. The cases were subsequently re-entered to reflect responses recorded in the original data. Any inconsistencies in coding were addressed so to reflect the most recent phase of data cleaning (e.g. age recorded as 60-70 and 65, 65 was retained as the response).

Geocoded Data

Any addresses that could not be readily geocoded were checked for accuracy. Once geocoded, SLA codes were matched to respective names by referring to the Australian Standard Geographical Classification (AGSC) (July 2009).

Exclusion of Respondents

After final cleaning of the dataset any cases were unable to geocoded (to the street address or cross-street), or were located in a suburb with an insufficient number of respondents, were excluded (for full list of excluded cases see appendix 6). A further 25 respondents were

excluded because address details revealed they did not live within the boundaries of the study area (Brisbane Statistical Division)⁴.

Due to an error during the sampling process, there were also several duplicate cases. These occurred where the CATI lab had called the same phone number twice and had interviewed the same respondent twice. Of these cases the original case was retained and the subsequent case deleted. N=14 cases were deleted. These are listed in Appendix 6. An additional two cases were identified which had conflicting address information so that a correct address could not be determined. These are also listed in Appendix 6.

Census Data (Socio-structural Variables)

2006 ABS census data was included in the main study in order to have suburb-level measures of socio-structural characteristics of the Brisbane communities. These included gender, age, population density, number of households with low household weekly income (<\$500), SEIFA Disadvantage, SEIFA advantage-disadvantage scores, number of persons born overseas, number of persons at different address five years ago, number of fully owned dwellings, number of total rented dwellings, and number of persons from non-English Speaking Background (NESB).

Queensland Police Service (QPS) Crime Data

The QPS crime data represents annual counts of reported offences from 2006 to 2007. The Crime incident data obtained from the Queensland Police Service (QPS) were categorised by offence type according to the research questions of the CCS project team. While the QPS already divides offence data into categories these were not suitable for the CCS. Categories created for the CCS project include: Violent Crime, Sexual Crime, Property Crime, Drug Crime, Domestic Violence, Public Nuisance Crime, and Total Crime. Offense categories were checked to ensure all appropriate offence types were incorporated and no overlapping occurred. A table which demonstrates the breakdown of the categories is included in Appendix 7 of this report. These categories are similar to those employed in the CCS Wave 1, with the exception of the offence “dangerous driving causing death”. In Wave 2 this offence was included as Other Homicide to maintain consistency with QPS categorisation. In Wave 1 this offence had been excluded from Homicide analyses. The total crime category is the sum total of: offences against the person, offences against property and other offences.

⁴ Respondents from Mt Pleasant in McKay (as opposed to Mt Pleasant, Brisbane) were erroneously entered into the sampling frame by the SRC.

Part V: Basic Statistics – Individual Level

SURVEY ITEMS

Section 1 - Community Capacity

Question 3: For each of the following statements please respond with very likely, likely, unlikely or very unlikely:								
			Very Unlikely	Unlikely	Don't Know	Likely	Very Likely	
a. {V3R01} If a group of community children were skipping school and hanging around on a street corner, how likely is it that people in your community would do something about it?								
			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Likely)	n	427	1346	161	1386	923	4243
Median	1 (Likely)	%	10.1	31.7	3.8	32.7	21.8	100.0
b. {V3R02} If some children were spray painting graffiti on a local building, how likely is it that people in your community would do something about it?								
			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	2 (Very likely)	n	107	355	77	1647	2056	4242
Median	1 (Likely)	%	2.5	8.4	1.8	38.8	48.5	100.0
c. {V3R03} If there was a fight in front of your house and someone was being beaten or threatened, how likely is it that people in your community would break it up?								
			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	2 (Very likely)	n	154	779	128	1543	1639	4243
Median	1 (Likely)	%	3.6	18.4	3	36.4	38.6	100.0
d. {V3R04} If a child was showing disrespect to an adult, how likely is it that people in your community would scold that child?								
			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	-1 (Unlikely)	n	383	1755	187	1474	444	4243
Median	-1 (Unlikely)	%	9.0	41.1	4.4	34.7	10.5	100.0
e. {V3R05} Suppose that because of budget cuts the fire station closest to your home was going to be closed down. How likely is it that community residents would organise to try and do something to keep the fire station open?								
			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	2 (Very likely)	n	102	534	160	1580	1867	4243
Median	1 (Likely)	%	2.4	12.6	3.8	37.2	44.0	100.0
f. {V3R06} If someone was publicly dealing drugs in your community, how likely is it that people in your community would do something about it?								
			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	2 (Very likely)	n	130	504	157	1537	1916	4244
Median	1 (Likely)	%	3.1	11.9	3.7	36.2	45.1	100.0

g. {V3R07} If someone was drunk in public in your community, how likely is it that people in your community would do something about it?			-2	-1	0	1	2	Total Valid	Missing Data
Mode	-1 (Unlikely)	n	303	2008	165	1322	445	4243	1
Median	-1 (Unlikely)	%	7.1	47.3	3.9	31.2	10.5	100.0	0.0
h. {V3R08} If people were speeding in cars along the streets in your community, how likely is it that people in your community would do something about it?			-2	-1	0	1	2	Total Valid	Missing Data
Mode	1 (Likely)	n	169	951	48	1657	1419	4244	0
Median	1 (Likely)	%	4.0	22.4	1.1	39.0	33.4	100.0	0.0
i. {V3R09} If a violent argument broke out between a woman and a man in their private residence, how likely is it that people in your community would do something about it?			-2	-1	0	1	2	Total Valid	Missing Data
Mode	-1 (Unlikely)	n	316	1624	189	1610	502	4241	3
Median	0 (Don't know)	%	7.5	38.3	4.5	38.0	11.8	100.0	0.0
j. {V3R10} If somebody was getting mugged, how likely is it that people in your community would do something about it?			-2	-1	0	1	2	Total Valid	Missing Data
Mode	1 (Likely)	n	83	390	110	2238	1422	4243	1
Median	1 (Likely)	%	2.0	9.2	2.6	52.7	33.5	100.0	0.0
k. {V3R11} If someone in your community was cutting down trees without council approval, how likely is it that people in your community would do something about it?			-2	-1	0	1	2	Total Valid	Missing Data
Mode	-1 (Unlikely)	n	346	1500	206	1270	918	4240	4
Median	1 (Likely)	%	8.2	35.4	4.9	30.0	21.7	100.0	0.0
l. {V3R12} If a new legal brothel was being planned for your community, how likely is it that people in your community would work together to stop it?			-2	-1	0	1	2	Total Valid	Missing Data
Mode	2 (Very likely)	n	98	534	221	1327	2061	4241	3
Median	1 (Likely)	%	2.3	12.6	5.2	31.3	48.6	100.0	0.0

Section 2 - Community Attachment

Question 4: I am going to ask about the level of community attachment in your area. For each of the following statements please indicate whether you strongly agree, agree, disagree or strongly disagree.								
			Strongly Disagree	Disagree	Don't Know	Agree	Strongly Agree	
a. {V4R01} People in this community are willing to help their neighbours			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	51	305	21	2618	1248	4243
Median	1 (Agree)	%	1.2	7.2	0.5	61.7	29.4	100.0
b. {V4R02} This is a close-knit community			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	72	1155	83	2192	741	4243
Median	1 (Agree)	%	1.7	27.2	2.0	51.7	17.5	100.0
c. {V4R03} People in this community can be trusted			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	47	472	156	2861	703	4239
Median	1 (Agree)	%	1.1	11.1	3.7	67.5	16.6	100.0
d. {V4R04} People in this community generally don't get along with each other			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	33	336	81	3127	666	4243
Median	1 (Agree)	%	0.8	7.9	1.9	73.7	15.7	100.0
e. {V4R05} People in this community do not share the same values			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	86	1004	226	2578	347	4241
Median	1 (Agree)	%	2.0	23.7	5.3	60.8	8.2	100.0
f. {V4R06} I feel that I belong to this local community			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	47	439	37	2846	871	4240
Median	1 (Agree)	%	1.1	10.4	0.9	67.1	20.5	100.0
g. {V4R07} I would like to be living in this local community in three years time			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	72	392	43	2276	1460	4243
Median	1 (Agree)	%	1.7	9.2	1.0	53.6	34.4	100.0
h. {V4R08} I am proud to live in this local community			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	32	251	48	2480	1431	4242
Median	1 (Agree)	%	0.8	5.9	1.1	58.5	33.7	100.0
i. {V4R09} I feel a responsibility to make a contribution to the local community I live in			-2	-1	0	1	2	Total Valid
								Missing Data
Mode	1 (Agree)	n	11	375	33	2834	989	4242
Median	1 (Agree)	%	0.3	8.8	0.8	66.8	23.3	100.0

j. {V4R10} I feel safe walking down the street after dark			-2	-1	0	1	2	Total Valid	Missing Data
Mode	1 (Agree)	n	200	920	60	2204	856	4240	4
Median	1 (Agree)	%	4.7	21.7	1.4	52.0	20.2	100.0	0.0
k. {V4R11} Adults in this community know who the local children are			-2	-1	0	1	2	Total Valid	Missing Data
Mode	1 (Agree)	n	93	1291	212	2234	411	4241	3
Median	1 (Agree)	%	2.2	30.4	5.0	52.7	9.7	100.0	0.0
l. {V4R12} There are adults in this community that children can look up to			-2	-1	0	1	2	Total Valid	Missing Data
Mode	1 (Agree)	n	21	399	286	2946	588	4240	4
Median	1 (Agree)	%	0.5	9.4	6.7	69.5	13.9	100.0	0.0
m. {V4R13} Parents in this community generally know each other			-2	-1	0	1	2	Total Valid	Missing Data
Mode	1 (Agree)	n	31	781	230	2749	448	4239	5
Median	1 (Agree)	%	0.7	18.4	5.4	64.9	10.6	100.0	0.0
n. {V4R14} You can count on adults in this community to watch out that children are safe and don't get into trouble			-2	-1	0	1	2	Total Valid	Missing Data
Mode	1 (Agree)	n	36	526	156	2885	631	4234	10
Median	1 (Agree)	%	0.9	12.4	3.7	68.1	14.9	100.0	0.0

Question 5: I am now going to ask you how other fellow residents view your community. Based on your feelings, experiences or your perceptions please indicate whether you strongly agree, agree, disagree or strongly disagree.									
			Strongly Disagree	Disagree	Don't Know	Agree	Strongly Agree		
a. {V5R01} People in this community live here because they want to			1	2	na	3	4	Total Valid	Missing Data
Mode	3 (Agree)	n	23	185	na	2538	1445	4191	53
Median	3 (Agree)	%	0.5	4.4	na	60.6	34.5	100.0	1.2
a. {Recoded V5R01} People in this community live here because they want to			-2	-1	0	1	2	Total Valid	Missing Data
Mode	1 (Agree)	n	23	185	50	2538	1445	4241	3
Median	1 (Agree)	%	0.5	4.4	1.2	59.8	34.1	100.0	0.1
b. {V5R02} The people around here feel they belong to this local community			1	2	na	3	4	Total Valid	Missing Data
Mode	3 (Agree)	n	19	258	na	2973	843	4093	151
Median	3 (Agree)	%	0.5	6.3	na	72.6	20.6	100.0	3.6

b. { Recoded V5R02 } The people around here feel they belong to this local community							Total Valid	Missing Data
			-2	-1	0	1	2	
Mode	1 (Agree)	n	19	258	148	2973	843	4241
Median	1 (Agree)	%	0.4	6.1	3.5	70.1	19.9	100.0
c. { V5R03 } People in my community are proud to live here							Total Valid	Missing Data
			1	2	na	3	4	
Mode	3 (Agree)	n	16	221	na	2851	1020	4108
Median	3 (Agree)	%	0.4	5.4	na	69.4	24.8	100.0
c. { Recoded V5R03 } People in my community are proud to live here							Total Valid	Missing Data
			-2	-1	0	1	2	
Mode	1 (Agree)	n	16	221	133	2851	1020	4241
Median	1 (Agree)	%	0.4	5.2	3.1	67.2	24.1	100.0
d. { V5R04 } People in my community feel a responsibility to make a contribution to the area							Total Valid	Missing Data
			1	2	na	3	4	
Mode	3 (Agree)	n	29	692	na	2782	496	3999
Median	3 (Agree)	%	0.7	17.3	na	69.6	12.4	100.0
d. { Recoded V5R04 } People in my community feel a responsibility to make a contribution to the area							Total Valid	Missing Data
			-2	-1	0	1	2	
Mode	1 (Agree)	n	29	692	239	2782	496	4238
Median	1 (Agree)	%	0.7	16.3	5.6	65.6	11.7	100.0
e. { V5R05 } Most people in my community would like to continue living in this area							Total Valid	Missing Data
			1	2	na	3	4	
Mode	3 (Agree)	n	13	159	na	2952	958	4082
Median	3 (Agree)	%	0.3	3.9	na	72.3	23.5	100.0
e. { Recoded V5R05 } Most people in my community would like to continue living in this area							Total Valid	Missing Data
			-2	-1	0	1	2	
Mode	1 (Agree)	n	13	159	158	2952	958	4240
Median	1 (Agree)	%	0.3	3.8	3.7	69.6	22.6	100.0

Section 3 – Community Relationships

Question 6: I would like now ask you a few questions about your community relationships. Apart from the people that you live with, how many relatives and friends live in your community?			
Mode	6 (More than ten)		
Median	4 (Seven/ Eight)		
Q6. How many friends/ family		n	%
None	0	834	19.7
One/ Two	1	329	7.8
Three/ Four	2	415	9.8
Five/ Six	3	538	12.7
Seven/ Eight	4	195	4.6
Nine/ Ten	5	302	7.1
More than Ten	6	1623	38.3
Total Valid		4236	100.0
Missing Data (Don't know= 5, refused = 3)		8	0.2

Question 7: How many people would you say you know in your community?			
Mode	2 (A few of them)		
Median	2 (A few of them)		
Q7. How many known in the community	n	%	
None of the people in your community	1	92	2.2
A few of them	2	2252	53.1
Many of them	3	1368	32.3
Most of them	4	526	12.4
Total Valid	4238	100.0	
Missing Data (Don't know=3, refused=3)	6	0.1	

Question 8. How many neighbours do you know by name?			
Mode	2 (A few of them)		
Median	3 (Most of them)		
Q8. How many neighbours known by name	n	%	
None of my neighbours	1	153	3.6
A few of them	2	1627	38.4
Most of them	3	1549	36.6
All of them	4	909	21.4
Total Valid	4238	100.0	
Missing Data (Don't know= 3, refused=3)	6	0.1	

Question 9. How many times have you had contact with a neighbour in the previous week?			
Mode	3 (Three of more times)		
Median	3 (Three of more times)		
Q9. How much contact with neighbours	n	%	
Have not had contact	0	617	14.6
Once	1	588	13.9
Twice	2	773	18.2
Three or more times	3	2258	53.3
Total Valid	4236	100.0	
Missing Data (Don't Know= 4, refused= 4)	8	0.2	

Question 10. During the past 12 months, without being paid have you					
		No	Yes		
a. {V10R01} Signed a petition		0	1	Total Valid	Missing Data
Mode 0 (No)	n	2761	1451	4212	32
	%	65.6	34.4	100.0	0.8
b. {V10R02} Attended a public meeting		0	1	Total Valid	Missing Data
Mode 0 (No)	n	3220	1018	4238	6
	%	76.0	24.0	100.0	0.1
c. {V10R03} Joined with people to resolve a local or community problem		0	1	Total Valid	Missing Data
Mode 0 (No)	n	3116	1121	4237	7
	%	73.5	26.5	100.0	0.2

Section 4 - Neighbouring Behaviour

Question 11 Based on your experiences,			Never	Rarely	Some- times	Often		
a. {V11R01} About how often do you and people in your community do favours for each other?			1	2	3	4	Total Valid	Missing Data
Mode	3 (Sometimes)	n	211	628	1762	1624	4225	19
Median	3 (Sometimes)	%	5.0	14.9	41.7	38.4	100.0	0.4
b. {V11R02} When a neighbour is not at home how often do you and other neighbours watch over their property?			1	2	3	4	Total Valid	Missing Data
Mode	4 (Often)	n	185	217	795	3026	4223	21
Median	4 (Often)	%	4.4	5.1	18.8	71.7	100.0	0.5
c. {V11R03} About how often do you and other neighbours ask each other advice about things such as child rearing or job openings?			1	2	3	4	Total Valid	Missing Data
Mode	3 (Sometimes)	n	1014	1001	1243	938	4196	48
Median	3 (Sometimes)	%	24.2	23.9	29.6	22.4	100.0	1.1
d. {V11R04} About how often do you and other neighbours visit in each others homes or on the street?			1	2	3	4	Total Valid	Missing Data
Mode	3 (Sometimes)	n	428	752	1629	1425	4234	10
Median	3 (Sometimes)	%	10.1	17.8	38.5	33.7	100.0	0.2
e. {V11R05} About how often do you and other neighbours have parties or other get togethers?			1	2	3	4	Total Valid	Missing Data
Mode	2 (Rarely)	n	1038	1243	1370	584	4235	9
Median	3 (Sometimes)	%	24.5	29.4	32.3	13.8	100.0	0.2
f. {V11R06} About how often do you and other neighbours spend leisure time together going out for dinner, to the movies, to a sporting event etc?			1	2	3	4	Total Valid	Missing Data
Mode	2 (Rarely)	n	1768	1183	945	335	4231	13
Median	1 (Never)	%	41.8	28.0	22.3	7.9	100.0	0.3

{FREQNEIGH} Individual Scale of Neighbouring	
Total Valid	4156
Scale Range	6.0 through to 24.0
Mean	16.51
Standard Deviation	4.12
Mode	18.0
Median	17.0

Section 5 - Community Problems

Question 12. Please tell me how much of a concern the following problems are in your community. Are they no problem, some problem or a big problem?			Don't know	No Problem	Some Problem	Big Problem		
a. {V12R01} Drugs			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	274	2007	1528	425	4234	10
Median	1 (No Problem)	%	6.5	47.4	36.1	10.0	100.0	0.2
b. {V12R02} Public Drinking			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	91	2549	1303	293	4236	8
Median	1 (No Problem)	%	2.1	60.2	30.8	6.9	100.0	0.2
c. {V12R03} People loitering or hanging out			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	44	2718	1215	261	4238	6
Median	1 (No Problem)	%	1.0	64.1	28.7	6.2	100.0	0.1
d. {V12R04} Run down or neglected buildings			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	14	3627	529	70	4240	4
Median	1 (No Problem)	%	0.3	85.5	12.5	1.7	100.0	0.1
e. {V12R05} Prostitution			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	295	3861	70	11	4237	7
Median	1 (No Problem)	%	7.0	91.1	1.7	0.3	100.0	0.2
f. {V12R06} Vandalism and/or graffiti			0	1	2	3	Total Valid	Missing Data
Mode	2 (Some Problem)	n	10	2041	1911	278	4240	4
Median	1 (No Problem)	%	0.2	48.1	45.1	6.6	100.0	0.1
g. {V12R07} Traffic problems like speeding or hooning			0	1	2	3	Total Valid	Missing Data
Mode	2 (Some Problem)	n	5	997	2395	843	4240	4
Median	2 (Some Problem)	%	0.1	23.5	56.5	19.9	100.0	0.1
h. {V12R08} Young people getting into trouble			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	205	2417	1366	248	4236	8
Median	1 (No Problem)	%	4.8	57.1	32.2	5.9	100.0	0.2
i. {V12R09} Poor lighting			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	35	2813	1028	361	4237	7
Median	1 (No Problem)	%	0.8	66.4	24.3	8.5	100.0	0.2
j. {V12R10} Overgrown shrubs or trees			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	10	3247	809	173	4239	5
Median	1 (No Problem)	%	0.2	76.6	19.1	4.1	100.0	0.1
k. {V12R11} Transients/homeless people on the streets			0	1	2	3	Total Valid	Missing Data
Mode	1 (No Problem)	n	49	4009	147	34	4239	5
Median	1 (No Problem)	%	1.2	94.6	3.5	0.8	100.0	0.1

Question 13. Who do you think should be primarily responsible for handling the following problems in your community? The police, the Council, Local Service Providers, Community Groups or Community Residents? By local service providers we mean local business or organisations like churches or non-government organisations.								
			Police	Council	Local Service Provider	Community groups	Community Resident	
a. {13R01}	Vandalism and/or graffiti in public space		1	2	3	4	5	Total Valid
								Missing Data
Mode	1 (Police)	n	2737	861	28	216	356	4198
Median	1 (Police)	%	65.2	20.5	0.7	5.1	8.5	100.0
b. {13R02}	Drug use in public space		1	2	3	4	5	Total Valid
								Missing Data
Mode	1 (Police)	n	3844	72	28	94	158	4196
Median	1 (Police)	%	91.6	1.7	0.7	2.2	3.8	100.0
c. {13R03}	Drinking in public space		1	2	3	4	5	Total Valid
								Missing Data
Mode	1 (Police)	n	3664	68	51	106	274	4163
Median	1 (Police)	%	88.0	1.6	1.2	2.5	6.6	100.0
d. {13R04}	Young people loitering in groups in public space		1	2	3	4	5	Total Valid
								Missing Data
Mode	1 (Police)	n	2666	170	114	449	698	4097
Median	1 (Police)	%	65.1	4.1	2.8	11.0	17.0	100.0
e. {13R05}	Fights in public space		1	2	3	4	5	Total Valid
								Missing Data
Mode	1 (Police)	n	3839	25	20	71	238	4193
Median	1 (Police)	%	91.6	0.6	0.5	1.7	5.7	100.0
f. {13R06}	Traffic problems like speeding or hooning		1	2	3	4	5	Total Valid
								Missing Data
Mode	1 (Police)	n	3662	374	10	47	121	4214
Median	1 (Police)	%	86.9	8.9	0.2	1.1	2.9	100.0
g. {13R07}	Disputes with neighbours		1	2	3	4	5	Total Valid
								Missing Data
Mode	2 (Council)	n	1822	1013	83	312	828	4058
Median	1 (Police)	%	44.9	25.0	2.0	7.7	20.4	100.0

Section 6 – Victimisation

Question 14. Please indicate whether the following events have happened often, sometimes, rarely or never in this community during the past six months.								
			Never	Rarely	Sometimes	Often		
a. {V14R01}	A fight in which a weapon was used		1	2	3	4	Total Valid	Missing Data
Mode	1 (Never)	n	3560	369	131	44	4104	140
Median	1 (Never)	%	86.7	9.0	3.2	1.1	100.0	3.3

b. {V14R02} A violent argument between neighbours			1	2	3	4	Total Valid	Missing Data
Mode	1 (Never)	n	3191	580	265	120	4156	88
Median	1 (Never)	%	76.8	14.0	6.4	2.9	100.0	2.1
c. {V14R03} A sexual assault or rape			1	2	3	4	Total Valid	Missing Data
Mode	1 (Never)	n	3638	308	93	24	4063	181
Median	1 (Never)	%	89.5	7.6	2.3	0.6	100.0	4.3
d. {V14R04} A robbery or mugging			1	2	3	4	Total Valid	Missing Data
Mode	1 (Never)	n	2483	815	630	197	4125	119
Median	1 (Never)	%	60.2	19.8	15.3	4.8	100.0	2.8

Question 15.			No	Yes		
Q15. While you have lived in this community has anyone ever used violence such as in a mugging, fight or sexual assault against you or any member of your household anywhere in your community?					Total Valid	Missing Data
			0	1		
Mode	0 (No)	n	3888	338	4226	18
		%	92.0	8.0	100.0	0.4

Question 16.			No	Yes		
Q16. If yes to Q15, was that in the past 6 months?					Total Valid	N/A
			0	1		
Mode	0 (No)	n	242	100	342	3902
		%	5.7	2.4	8.1	91.9

Question 17.			No	Yes		
Q17. While you have lived in this community, has your home ever been broken into?					Total Valid	Missing Data
			0	1		
Mode	0 (No)	n	3310	925	4235	9
		%	78.2	21.8	100.0	0.2

Question 18.			No	Yes		
Q18. If yes to Q17, was this in the past 6 months?					Total Valid	Missing Data
			0	1		
Mode	0 (No)	n	847	82	929	3315
		%	20.0	1.9	21.9	78.1

Question 19.			No	Yes		
Q19. While you have lived in this community have you or another member of your household had property damaged, including damage to vehicles parked in the street, to the outside of your home, or to other personal property?					Total Valid	Missing Data
			0	1		
Mode	0 (No)	n	3067	1170	4244	7
		%	72.4	27.6	100.0	0.2

Question 20.		No	Yes		
Q20. If yes to Q19, was this in the past 6 months?		0	1	Total Valid	Missing Data
Mode	0 (No)	n 771	400	1171	3073
		% 18.2	9.4	27.6	72.4

Appendix Two: Community Capacity Study Survey for Wave 2

IF THE RESPONDENT HAD PARTICIPATED IN WAVE 1:

Good afternoon/evening. My name is ____ and I'm calling from the University of Queensland Social Research Centre in Brisbane. May I please speak to ____?

You participated in a previous study on community and crime in 2005. At that time you agreed to participate in future research on this topic. We are presently continuing our study on local community life, victimization, and crime in the Greater Brisbane area. The findings from this study will assist in developing crime prevention programs and in improving the capacity of Brisbane communities. Your continuing participation is very important to this research. Your responses will be kept confidential and no identifying information will be released.

Would you be willing to continue with this study?

1. Yes, now..... 1
2. Not now, another time..... 2
3. Respondent Not available- Dead..... 3
4. Respondent Not Available- Too ill, Disabled..... 4
5. Respondent Not Available- Wrong Number..... 5
6. Respondent Not Available- Permanently Relocated..... 6
7. Refused to participate..... 7

OR

IF THE RESPONDENT HAD WAS A NEW PARTICIPANT:

Good afternoon/evening. My name is ____ and I'm calling from the University of Queensland Social Research Centre in Brisbane. As part of an Australian Research Council project with Griffith University, we are currently undertaking research in selected suburbs about community and crime.

We are conducting this study in sampled suburbs. To ensure your suburb is selected, could you please tell me the name of the suburb we have called?

IF QUOTA FULL:

Quota for this suburb is full. Thank you for your time.

IF ANOTHER SUBURB:

Unfortunately we can't continue with this interview (because your suburb has not been selected /or no name provided). Thank you very much for your assistance.

I need to talk to the person in your household who is 18 or over and most recently celebrated a birthday. Would that be you?

IF NOT CORRECT PERSON READ AGAIN:

Good afternoon/evening. My name is ____ and I'm calling from the University of Queensland Social Research Centre in Brisbane. As part of an Australian Research Council project with Griffith University, we are currently undertaking research in selected suburbs about community and crime.

This is a voluntary study exploring local community life, victimization, and crime in the Greater Brisbane area. This study has been approved by the University's Ethics Committee. Individual responses are kept confidential. You are free to withdraw from the interview at any stage. Names or

data that would allow identification of participants will NOT be released. Are you willing to include your opinions in this study? The interview will take approximately 15 minutes depending on your answers.

1. Yes, now..... 1
2. No UR 18+ available eg need callback - CBH Arrange callback..... 2
3. No UR 18+ available during survey due to being away - UHA3..... 3
4. No UR 18+ available during survey because of illness – UHI..... 4
5. No UR 18+ who can understand English – LPH..... 5
6. No UR 18+ who can hear – HPH..... 6
7. No UR 18+ has other disability – DPH..... 7
8. No UR 18+ has a speech problem – SPH..... 8
9. No UR 18+ has intellectual problem – IPH..... 9
10. No UR 18+ in household eg holiday home – OSH..... 10
11. Business telephone number only – OSB..... 11
12. Refused by person but confirmed as a household – REH..... 12
13. Refused by person but unknown if number is a household – REO..... 13

Q. 1 Could you please tell me your age?

1. Age..... 1
2. Refused..... 2

Q. 2 Are you male or female?

1. Male..... 1
2. Female..... 2
3. Refused..... 3

Section 1 – Community Capacity

I am going to read some statements about things that people in your community may or may not do.

Q. 3 For each of the following statements, please respond with very likely, likely, unlikely, or very unlikely.

	Very unlikely	Unlikely	Likely	Very Likely	Don't Know	Refused
1. a) If a group of community children were skipping school and hanging around on a street corner, how likely is it that people in your community would do something about it?	1	2	3	4	5	6
2. b) If some children were spray painting graffiti on a local building, how likely is it that people in your community would do something about it?	1	2	3	4	5	6
3. c) If there was a fight in front of your house and someone was being beaten or threatened, how likely is it that people in your community would break it up?	1	2	3	4	5	6
4. d) If a child was showing						

disrespect to an adult, how likely is it that people in your community would scold that child?	1	2	3	4	5	6
5. e) Suppose that because of budget cuts the fire station closest to your home was going to be closed down. How likely is it that community residents would organise to try and do something to keep the fire station open?	1	2	3	4	5	6
6. f) If someone was publicly dealing drugs in your community, how likely is it that people in your community would do something about it?	1	2	3	4	5	6
7. g) If someone was drunk in public in your community, how likely is it that people in your community would do something about it?	1	2	3	4	5	6
8. h) If people were speeding in cars along the streets in your community, how likely is it that people in your community would do something about it?	1	2	3	4	5	6
9. i) If a violent argument broke out between a woman and a man in their private residence, how likely is it that people in your community would do something about it?	1	2	3	4	5	6
10. j) If somebody was getting mugged, how likely is it that people in your community would help that person?	1	2	3	4	5	6
11. k) If someone in your community was cutting down trees without council approval, how likely is it that people in your community would do something about it?	1	2	3	4	5	6
12. l) If a new legal brothel was being planned for your community, how likely is it that people in your community would work together to stop it?	1	2	3	4	5	6

Section 2 – Community Attachment

I am now going to ask you about the level of community attachment in your area.

Q. 4 For each of the following statements, please indicate whether you strongly agree, agree, disagree or strongly disagree.

	Strongly disagree	Disagree	Agree	Strongly agree	Don't Know	Refused
1. a) People in this community are willing to help their neighbours.	1	2	3	4	5	6
2. b) This is a close-knit community.	1	2	3	4	5	6
3. c) People in this community can be trusted.	1	2	3	4	5	6
4. d) People in this community generally don't get along with each other.	1	2	3	4	5	6
5. e) People in this community do not share the same values.	1	2	3	4	5	6
6. f) I feel that I belong to this local community.	1	2	3	4	5	6
7. g) I would like to be living in this local community in three years time.	1	2	3	4	5	6
8. h) I am proud to live in this local community.	1	2	3	4	5	6
9. i) I feel a responsibility to make a contribution to the local community I live in.	1	2	3	4	5	6
10. j) I feel safe walking down the street after dark.	1	2	3	4	5	6
11. k) Adults in this community know who the local children are.	1	2	3	4	5	6
12. l) There are adults in this community that children can look up to.	1	2	3	4	5	6
13. m) Parents in this community generally know each other.	1	2	3	4	5	6
14. n) You can count on adults in this community to watch out that children are safe and don't get into trouble.	1	2	3	4	5	6

I am now going to ask you how other fellow residents view your community.

Q. 5 Based on your feelings, experiences and your perceptions, please indicate whether you strongly agree, agree, disagree, or strongly disagree with the following statements.

Strongly	Disagree	Agree	Strongly	Don't	Refused
----------	----------	-------	----------	-------	---------

	disagree			agree	Know	
1. a) People in this community live here because they want to.	1	2	3	4	5	6
2. b) The people around here feel they belong to this local community.	1	2	3	4	5	6
3. c) People in my community are proud to live here.	1	2	3	4	5	6
4. d) People in my community feel a responsibility to make a contribution to the area.	1	2	3	4	5	6
5. e) Most people in my community would like to continue living in this area.	1	2	3	4	5	6

Section 3 – Community Relationships

I would like to now ask you a few questions about your community relationships.

Q. 6 Apart from the people that you live with, how many relatives and friends live in your community?

- 0. None.....0
- 1. One or two.....1
- 2. Three or four.....2
- 3. Five or six.....3
- 4. Seven or eight.....4
- 5. Nine or ten.....5
- 6. More than 10.....6
- 7. Don't know.....7
- 8. Refused.....8

Q. 7 Would you say that you know...

- 1. None of the people in your community.....1
- 2. A few of them.....2
- 3. Many of them.....3
- 4. Most of them.....4
- 5. Don't know.....5
- 6. Refused.....6

Q. 8 How many of your neighbours would you know by name?...

- 1. None of my neighbours.....1
- 2. A few of them.....2
- 3. Most of them.....3
- 4. All of them.....4
- 5. Don't know.....5
- 6. Refused.....6

Q. 9 How many times have you had contact with a neighbour in the previous week?

0. Have not had contact.....	0
1. Once.....	1
2. Twice.....	2
3. Three times or more.....	3
4. Don't know.....	4
5. Refused.....	5

Q. 10 During the last 12 months, without being paid, have you...

	Yes	No	Don't know	Refused
1. a) Signed a petition	1	2	3	4
2. b) Attended a public meeting	1	2	3	4
3. c) Joined with people to resolve a local or community problem	1	2	3	4

Q. 11 Based on your experiences

	Never	Rarely	Sometimes	Often	Don't Know	Refused
1. a) About how often do you and people in your community do favours for each other?	1	2	3	4	5	6
2. b) When a neighbour is not at home how often do you and other neighbours watch over their property?	1	2	3	4	5	6
3. c) About how often do you and people in your community ask each other advice about things such as child rearing or job openings?	1	2	3	4	5	6
4. d) About how often do you and people in your community visit in each other's homes or on the street?	1	2	3	4	5	6
5. e) About how often do you and people in your community have parties or other get togethers?	1	2	3	4	5	6
6. f) About how often do you and people in your community spend leisure time together going out for dinner, to the movies, to a sporting event etc?	1	2	3	4	5	6

Section 5 – Community Problems

I am now going to read a list of things that are problems in some communities.

Q. 12 Please tell me how much of a concern the following problems are in your community. Are they no problem, some problem, or a big problem?

	No problem 1	Some problem 2	Big problem 3	Don't Know 4	Refused 5
1. a) Drugs					
2. b) Public drinking	1	2	3	4	5
3. c) People loitering or hanging out	1	2	3	4	5
4. d) Run down or neglected buildings	1	2	3	4	5
5. e) Prostitution	1	2	3	4	5
6. f) Vandalism and/or graffiti	1	2	3	4	5
7. g) Traffic problems like speeding or hooning	1	2	3	4	5
8. h) Young people getting into trouble	1	2	3	4	5
9. i) Poor lighting	1	2	3	4	5
10. j) Overgrown shrubs or trees	1	2	3	4	5
11. k) Transients/homeless people on the streets	1	2	3	4	5

Q. 13 Who do you think should be primarily responsible for handling the following problems in your community? The Police, the Council, Local Service Providers, Community Groups or Community Residents?

(If necessary explain that by local service providers, we mean local businesses or organisations like churches or non-government organisations. By community groups we mean Neighbourhood Watch or school-based groups. By community residents we mean fellow residents.)

	Police	Council	Local service providers	Community groups	Community residents	Don't know	Refused
1. a) Vandalism and/or graffiti in public space	1	2	3	4	5	6	7
2. b) Drug use in public space	1	2	3	4	5	6	7
3. c) Drinking in public space	1	2	3	4	5	6	7
4. d) Young people loitering in groups in public space	1	2	3	4	5	6	7
5. e) Fights in public space	1	2	3	4	5	6	7

6. f) Traffic problems like speeding or hooning	1	2	3	4	5	6	7
7. g) Disputes with neighbours	1	2	3	4	5	6	7

Section 6 – Victimization

The next section asks about victimization that may have happened in your community, to yourself or to members of your household. If any of these questions cause you any distress, we can provide you with a list of counsellors who will be able to help you upon request.

Q. 14 Please indicate whether the following events have happened often, sometimes, rarely, or never in this community during the past six months.

	Often	Sometimes	Rarely	Never	Don't know	Refused
1. a) A fight in which a weapon was used	1	2	3	4	5	6
2. b) A violent argument between neighbours	1	2	3	4	5	6
3. c) A sexual assault or rape	1	2	3	4	5	6
4. d) A robbery or mugging	1	2	3	4	5	6

Q. 15 While you have lived in this community, has anyone ever used violence such as in a mugging, fight or sexual assault you or any member of your household anywhere in your community?

- | | |
|--------------------|---|
| 1. Yes..... | 1 |
| 2. No..... | 2 |
| 3. Don't know..... | 3 |
| 4. Refused..... | 4 |

IF NOT 1 IN Q15 GO Q17

Q. 16 Was that in the past 6 months?

- | | |
|--------------------|---|
| 1. Yes..... | 1 |
| 2. No..... | 2 |
| 3. Don't know..... | 3 |
| 4. Refused..... | 4 |

Q. 17 While you have lived in this community, has your home ever been broken into?

- | | |
|--------------------|---|
| 1. Yes..... | 1 |

Q. 23 Do you identify yourself as an Aboriginal or Torres Strait Islander or are you of Australian South Sea Islander origin?

1. Yes - Aboriginal or Torres Strait Islander..... 1
2. Yes - South Sea Islander.....2
3. Yes - both Aboriginal or Torres Strait Islander and South Sea Islander.....3
4. No..... 4
5. Refused..... 5

Q. 24 How would you describe your current marital status?

1. Never married..... 1
2. Married..... 2
3. Other 'live-in' relationship (de facto)..... 3
4. Separated but not divorced..... 4
5. Divorced..... 5
6. Widowed..... 6
7. Refused..... 7

Q. 25 How many dependent children under the age of 18 live at this address?

1. Number (specify Q25A)..... 1
2. Don't know.....2
3. Refused..... 3

Q. 25A Number of dependent children

Q. 26 What is your highest educational achievement?

1. Post graduate qualifications..... 1
2. A university or college degree..... 2
3. A trade, technical certificate or diploma..... 3
4. Completed senior high school..... 4
5. Completed junior high school..... 5
6. Primary school.....6
7. No schooling.....7
8. Other (specify Q26A)..... 8
9. Refused..... 9

Q. 26A Highest Other Education

Q. 27 How would you best describe your current employment status?

1. Working full-time..... 1
2. Working part-time..... 2
3. On a sick or disability pension..... 3
4. On a sole parent's pension..... 4
5. On an aged pension..... 5
6. Retired - self-supporting..... 6
7. Unemployed and seeking work..... 7
8. Home duties..... 8
9. Student..... 9
10. Other (specify Q27A)..... 10
11. Refused..... 11

Q. 27A Other Employment Status

Q. 28 What was the approximate household annual income including pensions, income from investments and family allowances for the last 12 months before a tax (gross income) was taken out?

1. Less than \$20,000..... 1
2. \$20,000 to less than \$40,000 (\$39,999)..... 2
3. \$40,000 to less than \$60,000 (\$59,999)..... 3
4. \$60,000 to less than \$80,000 (\$79,999)..... 4
5. \$80,000 or more..... 5
6. Don't know..... 6
7. Refused..... 7

Q. 29 What is your religion?

1. Catholic..... 1
2. Anglican (Church of England)..... 2
3. Uniting Church..... 3
4. Presbyterian..... 4
5. Lutheran..... 5
6. Islam..... 6
7. Greek Orthodox..... 7
8. Baptist..... 8
9. Other (specify Q29A)..... 9
10. No religion..... 10
11. Don't know..... 11
12. Refused..... 12

Q. 29A Religion

Q. 30 Do you or your family own or rent the residence where you are currently living?

1. Yes – own
2. Yes – rent
3. Other (specify Q30A)
4. Don't know
5. Refused

Q. 30A Other

Q. 31 How long have you ever lived at this current address?

1. Less than 6 months
2. 6 month to less than 12 months
3. 12 months to less than 2 years
4. 2 years to less than 5 years
5. 5 years to less than 10 years
6. 10 years to less than 20 years'
7. 20 years or more
8. Don't know
9. Refused

IF NOT 1-4 IN Q31 GO Q33

Q. 32 How many times have you moved in the past five years?

1. Not moved
2. Number of moves (specify Q32A)

3. Don't know
4. Refused

Q. 32A Times Moved

Q. 33 Can we please have the street number and street name of your residence? This information will help us to calculate distances between where people live and amenities in the community, such as the distance people have to travel to get to bus stops, shopping centres, and schools.

1. Street Number (specify Q33A)
2. Street Name (specify Q33B)
3. Street Extension, e.g. St, Rd, Ave, Cres (specify Q33C)
4. Suburb (specify Q33D)
5. Don't know
6. Refused

IF 5-6 IN Q33 GO Q34

IF 1-4 IN Q33 GO Q35

Q. 33A Street Number

Q. 33B Street Name

Q. 33C Street Extension

Q. 33D Suburb

Q. 34 Can we please have the names of the nearest cross streets to your residence?"

1. Cross Street 1 (specify Q34A)..... 1
2. Cross Street 2 (specify Q34B)..... 2
3. Don't know..... 3
4. Refused..... 4

GO to Q35

Q. 34A Cross street 1

Q. 34B Cross street 2

Q. 35 We would like to contact you again in the future to further discuss community life in your suburb. This research is very important in assisting efforts to reduce crime and improve community capacity. Your continued participation would be greatly appreciated. Would this be acceptable to you?

1. Yes (specify name Q35A)..... 1
2. Yes (specify 35B)..... 2
3. No..... 3
4. Refused..... 4

Q. 35A Name

Q. 35B Phone number

Q. 36 Closure

That concludes the survey. If you have any queries or concerns regarding this research you can contact Rebecca Wickes directly on 3365-2204.
Thank you very much for your assistance."

Q. 99END Interviewer Comment

1. Interview was completed WITH some concerns (specify Q99END1).....1
2. Interview was completed WITHOUT any problem.....2

Appendix Three: Univariate Statistics for New Scales - Wave 2

Scale/Construct	No. Items	N	Mean (SE)	Std Deviation	Range	α
Collective Efficacy for Child Centred Control	4	116	8.81(.20)	2.15	4-15	.64*
Collective Efficacy for Disorder	3	124	7.69(.18)	2.02	3-12	.68
Collective Efficacy for Violence	3	130	8.51(.18)	2.04	3-12	.74
Collective Efficacy for Civic Matters	4	110	11.07(.27)	2.75	4-16	.73
Ecometric Community Attachment	5	91	14.89(.28)	2.65	6-20	.87
Neighbouring Behaviour: Instrumental Exchange	3	133	6.80(.24)	2.75	3-12	.84
Neighbouring Behaviour: Affective Exchange	3	138	5.57(.23)	2.65	3-12	.87

*Reliability increases to .66 if the children skipping school item is removed

Appendix Four: Response Frequencies – Responsibility for Community Problems

Frequencies for Responsibility Items– Percent Attributing Responsibility

Actual wording “Who do you think should be primarily responsible for handling the following community problems in your community?”

Problem	N	Police	Council	Local Service Providers	Community Groups	Community Residents
Vandalism/Graffiti	143	60	32	0	6	2
Paint sniffing	146	80	3	7	5	5
Drug use	146	93	1	2	3	1
Drug dealing	146	97	0	0	2	1
Public drinking	144	83	3	5	3	6
Loitering youth	146	38	16	12	18	16
Fights	146	90	3	1	2	4
Speeding/hooning	146	86	9	0	1.5	3.5
Disputes with neighbours	145	53	15	2	10	20
